

Linux system administrator / DevOPS Engineer (f/m/n)

Full time - Karlsruhe, Germany

Our mission is to bootstrap the Service 4.0 industry.

Responsibilities

- Expansion of the software development processes with regard to deployment and automation.
- Further development and implementation of the strategy for our different environments DEV / TEST / PROD in interaction with all applications.
- Improvement of application management regarding operational stability, health checks, self-recovery and other preventive measures.
- Conception and extension of the system and application monitoring including alertings.
- Optimization of IT operations to increase SLAs and reduce operational errors.
- Creation and maintenance of operations manuals as well as further standardization of the collection of operational requirements.
- Further development of cooperation between IT administration, application development and quality assurance as well as continuous improvement of IT security.
- Participation in 24/7 operations.

Required Skills

- You have a degree in computer science or are trained as an IT specialist (f/m/n) system integration or have comparable qualifications.
- Several years of professional experience in system administration in medium-sized companies on Linux with databases (MySQL) and PHP application servers.
- Extensive experience in optimizing IT operations from an application perspective as well as experience in DevOps processes.
- Extensive experience in implementing automation in IT operations (scripts based on e.g. Python, bash).
- Strong understanding of efficient methods and techniques for application management as well as continuous striving for optimization.
- Structured and analytical approach, communication and team skills.

A mentoring program, which accompanies you from your first day at work and provides you with advice and support

Excellent working conditions in modern offices

Countless benefits such as team events, flat rate for hot and cold drinks, smoothies, daily fresh fruits and vegetables, healthy snacks, team lunch and much more

About 320EAST

320EAST is a German technology company based in the center of the Karlsruhe technology region. We develop and operate our IoT platform as a SaaS solution with our own hardware.

Our mission is to bootstrap the Service 4.0 industry.

Due to the daily increasing lack of personnel, the quality of services changes to the negative. They come to a standstill or are not offered at all. Our platform of hardware and services provides a broad technical and operational foundation for service providers (our customers) worldwide.

We not only provide a measurable way out of the service dilemma, but also create new business opportunities for service providers.

„One-Stop IoT SaaS boots up Service 4.0“

320EAST GmbH is located in Karlsruhe (Register Mannheim), Germany.

**We look forward to receiving your application by e-mail with a meaningful CV and photo.
You are welcome to show work samples and name references.**
